Professional Summary

Detail-oriented professional holding both an M.S. in Computer Science and a B.S. in Cybersecurity. Skilled in network monitoring, threat detection, and incident response using Wireshark, Zeek, and Kali Linux. Seeking a dynamic cybersecurity role to apply academic training and hands-on technical experience to actively defend enterprise infrastructure.

Education

- Troy University **— M.S. Computer Science** | Dec 2026
- Troy University — **B.S. Cybersecurity** | Dec 2023

Experience

Student Worker – Computer Science Dept. **Troy University | Sept 2025 – Dec 2026**

- Maintained and supported computer lab systems and networks, ensuring system reliability and adherence to basic security practices
- Assisted students with cybersecurity fundamentals, programming concepts, and introductory threat analysis

Academic Projects & Research

Master's Thesis: IoT Network Privacy Analysis

- Designing and executing a comprehensive privacy analysis of smart home IoT device network traffic metadata.
- Configuring virtualized environments and utilizing Wireshark, Zeek, Snort, and Kali Linux for advanced packet analysis and telemetry logging.

Practical Cybersecurity & Systems Administration

- Performed secure data destruction on hardware using ATA Secure Erase protocols to safely decommission devices.
- Monitored network security by reviewing device connection logs and configuring access controls.

Technical Skills

Programming / Scripting: Python, Java, C++
Cybersecurity Tools: Wireshark, Zeek, Snort, Nmap, pfSense, IPTables
Security Concepts: Network Security, IDS/IPS, Incident Response, Threat Detection, Vulnerability Assessment **Operating Systems:** Linux (Ubuntu, Kali), Windows, macOS

Soft Skills

Problem Solving | Critical Thinking | Communication | Documentation | Collaboration
